

Rajat Singh

Full-Stack & AI Developer

Available for Remote • Contract • Freelance

✉ hello@rajatcs.com 🌐 rajatcs.com 🔗 LinkedIn 🐙 GitHub

Professional Summary

Full-Stack & AI Developer specializing in SaaS products, AI agents and modern web applications. Experienced building production-ready applications using React, Next.js, FastAPI, Astro, Supabase, PostgreSQL, LangGraph and OpenAI APIs. Delivered enterprise software for international clients while independently designing, developing and deploying full-stack products from idea to production.

Technical Skills

Frontend: TypeScript, JavaScript, React, Next.js, Astro, Angular, Tailwind CSS
Backend & Databases: Python, FastAPI, Node.js, Supabase, PostgreSQL, Prisma, SQL
AI & Agents: OpenAI, Gemini, LangGraph, LangChain, RAG
Cloud & DevOps: Cloudflare, Vercel, Google Cloud Platform, Netlify, Git, GitHub

Professional Experience

Independent Full-Stack & AI Developer 2023–Present

- Architected and launched **5+ production-ready SaaS products** and MVPs for international clients using Next.js, TypeScript, FastAPI, Supabase, and PostgreSQL.
- Developed **3+ autonomous multi-agent AI workflows** using LangGraph, LangChain, OpenAI, and Gemini APIs, automating complex business logic and minimizing workflow latency.
- Designed scalable REST APIs and orchestrated high-availability deployments on Cloudflare, GCP, Vercel, and Netlify to handle active client traffic.

Freelance Frontend Developer 2023

- Developed responsive web applications and dashboards using React, Next.js, TypeScript and Tailwind CSS.
- Built 15+ reusable UI components and integrated REST APIs to deliver production-ready frontend solutions.
- Collaborated directly with clients to gather requirements, implement features and deploy applications to Vercel and Netlify.

Software Engineer — Clover IT Services 2022–2023

- Engineered enterprise applications for Leonardo247 and Ziplingo using React, Angular and secure REST APIs.
- Delivered 20+ dashboard screens, reusable component libraries and API-driven workflows for business operations.
- Diagnosed and resolved frontend defects, reducing production issues and improving application reliability.
- Optimized existing features, implemented new functionality and collaborated with cross-functional teams throughout the development lifecycle.
- Worked within Agile sprints using Git-based workflows, contributing to feature delivery and continuous product improvements.

Featured Projects

Traivler	AI travel planner using LangGraph agents, FastAPI and OpenAI to generate personalized travel itineraries.
Selrite	AI Voice Sales Representative qualifying leads and syncing call analytics to a Supabase CRM, built with Next.js, Vapi SDK, OpenAI, and Supabase.
Cloudy Unicorn pSEO	Programmatic SEO platform generating optimized SaaS comparison pages for organic search traffic.
AlcoholDetect.com	Responsive BAC calculator delivering real-time alcohol estimates with SEO-focused architecture.
Leonardo247	Enterprise property management software featuring React dashboards and scalable business workflows.
Ziplingo	Customer engagement platform for managing SMS, email and push notification campaigns.

Education

Bachelor of Technology (B.Tech.) in Computer Science & Engineering
National Institute of Technology, Rourkela
